

# Help Make '12 the Summer of CUSTOMIZED LEARNING

I need tomorrow's classroom today.

*Needed: Ed students'*

*If just a few students of education pitch in this summer, we can make a world of difference in bringing blended and alternative learning to HS students.*

- 1 **Explore--Learn how HS students can use credit flex to make school fit them.**
- 2 **Reach out--to students, teachers, community to collect more examples.**
- 3 **Share options and lessons-learned with students who can use them next fall.**

*Can it be done? Can Ohio see...*

## Ten Thousand Credit Flex Students by 2013

*They need your help!*

Digital learning, too!

Customized learning is for every student who sits in class wondering why she's there, thinking 'there must be a better, more compelling way'.

Creditflex offers relevance and rigor.

It's for those who learn perhaps in a different way.

...For those who already know the content of a class they're required to take.

...For students who want to challenge themselves, or learn content that just isn't offered.
